

JOSE IGNACIO VALLEJOS NAVAS

Salesforce Developer & Python Backend Engineer

Remote | ignaciovalejosnavas@gmail.com | LinkedIn | GitHub

Executive Summary

Salesforce Developer & Python Backend Engineer with 3+ years of experience building scalable applications in **Salesforce Sales Cloud** and **FastAPI**. Proven track record in process automation, data integration (BigQuery, REST APIs), and leading cross-functional teams. Strong expertise in Salesforce Administration, Apex, Flows, and Lightning Web Components (LWC).

Technical Skills

- **Salesforce Ecosystem:** Apex, SOQL, Lightning Web Components (LWC), Flows, Process Builder, Data Loader, Sales Cloud, REST APIs Integration.
- **Backend & APIs:** Python (FastAPI, REST APIs), SQL, Postman, Docker.
- **Cloud & Data Analytics:** Google Cloud Platform (Cloud Functions, BigQuery), Looker, SPSS.
- **Frontend Development:** React, HTML5 / CSS3, JavaScript (ES6+).
- **Tools & DevOps:** Git (GitHub, Bitbucket), DigitalOcean, CI/CD Workflows, Google Workspace, Advanced Excel.
- **Languages:** Spanish (Native), English (C1 - Advanced Professional Proficiency).

Professional Experience

Mid Tech Content Manager | *OLIVER Marketing*

May 2025 – July 2026

- Developed and executed CRM-focused content strategies to improve customer engagement and support core business objectives. - Managed the end-to-end content lifecycle within a centralized digital library. - Supported oversight of a content team and collaborated closely with Marketing, Sales, and Data Analytics departments to ensure strategic alignment. - Implemented a tagging and categorization system within the CRM to enable hyper-personalized campaigns. Conducted regular audits for compliance, accuracy, and brand relevance.

Tech Lead Backend | *Lader (Remote)*

February 2025 – July 2025

- Led the backend development of the **Tierra de Oportunidades** web application. - Structured GitHub organization workflows and configured self-hosted GitHub Runners to maintain issue tracking and CI/CD execution. - Created and managed a Docker repository for containerized organization microservices. - Configured and deployed background workers on DigitalOcean integrated with the Docker repository. - Enforced Python (FastAPI) clean code best practices on production servers servicing multiple endpoints. - Documented system architecture and collaborated closely on UX/UI alignment with the frontend engineering team.

Salesforce Mentor | *Guayerd (Remote)*

December 2023 – May 2024

- Coached aspiring Salesforce Administrators on certification preparation, Sales Cloud best practices, and declarative process automation.

Salesforce Developer | *Adsmovil (Remote)*

August 2022 – October 2023

- Developed end-to-end Salesforce solutions for major enterprise clients including **Rappi**, **Glovo**, and **Far-**

matodo, leading projects from requirements gathering to production deployment. - **Process Automation (15+ Business Processes):** - Migrated critical automations from Process Builder to Salesforce Flows, improving execution efficiency by 30%. - Implemented data validation rules and automated email alerts, reducing manual data entry errors by 40%. - **Data Integration & ETL:** - Architected serverless ETL pipelines using Python and Google Cloud Functions to sync Salesforce data with Google BigQuery, enabling real-time analytics. - **Analytics & Reporting:** - Built executive dashboards to track sales performance, quotas, and product trends, actively adopted by 50+ business users.

Operations Manager | *MODOC S.A* (Posadas)

January 2021 – August 2022

- Digitalized operations across 5+ branches using Google Sheets, reducing reporting errors by 80% and speeding up operational controls by 50%. - Developed Excel-based tracking systems to automate document status updates, cutting processing time by 95%. - Trained 10+ team members across branches on security protocols, digital tools, and operational workflows.

Key Achievements

- **Salesforce Automation:** Reduced manual data entry by 70% across business workflows through Salesforce Flows and Python automation scripts.
- **Data Pipelines:** Architected a serverless data pipeline (Salesforce → BigQuery) leveraging GCP Cloud Functions for scalable real-time analytics.
- **Leadership & Enablement:** Trained and mentored 10+ cross-branch team members on security protocols, CRM best practices, and development tools.

Education

Software Engineering

Universidad Cuenca del Plata | *Jan 2025 – Dec 2030 (Expected)*
